Android Based Vehicle Tracking Application

**NaxerTech** introduces its new innovation in the tracking world - "ATLAS" - android based vehicle tracking application. ATLAS is a revolutionary way for tracking your vehicle/ fleet. Efficiently track and manage your vehicle/ fleet. Increase efficiency, reduce paperwork processing time, know where your vehicles are and make smart decisions. Track your Cars, Trucks, Motorcycles, Boats or Heavy Construction Vehicles - fits for any type and size of fleet.

## Operation

Android based vehicle tracking application. Run the application over android based cell phones or tablets.

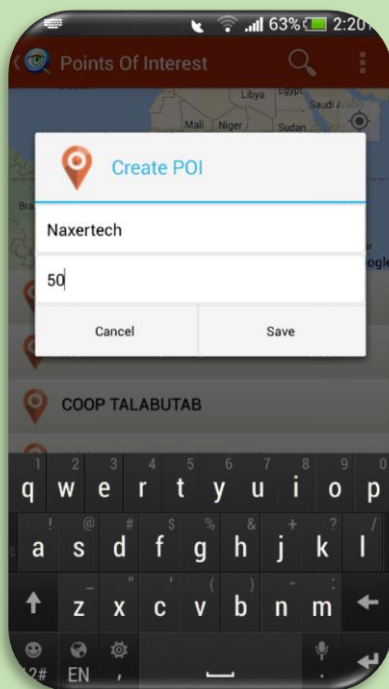

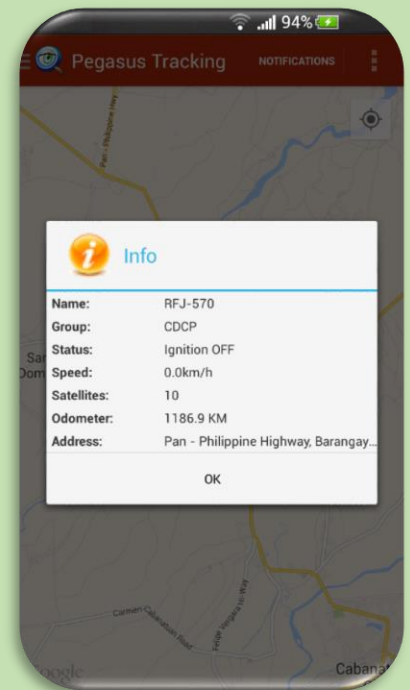

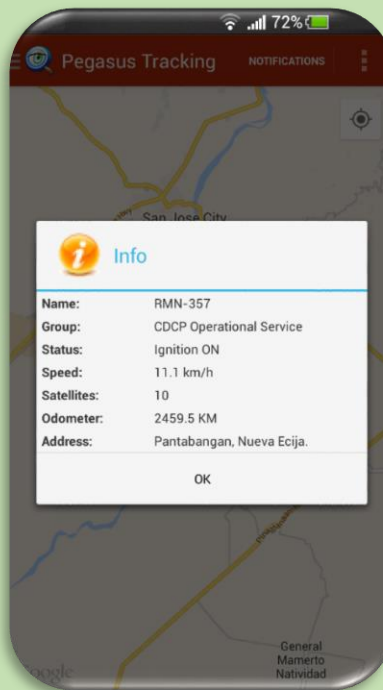

## Locate

Most easy way to locate a single vehicle or complete fleet on your android cell phone or tablet.

## Status

Get current status & location of your vehicle on your Android cell phone or tablets.

## POI

Create new POIs easily using cell phone's GPS and Google's location services. POIs created through ATLAS will be automatically available in Pegasus system under the same account and vice versa.

## Alerts & Notifications

Get real time Notifications & Alerts i.e. Geofence breach alert, Speed violation alert, Ignition On/ OFF alert etc.
